SUBJECT INDEX

3G mobile communication
mobile agent-based advanced service archit. for wireless Internet telephony, design, implement., and eval. *Emako, B.*, + , *T-C Jun 03* 690-705

A

Access protocols
adaptive approaches to relieving broadcast storms in wireless multihop mobile ad hoc network. *Yu-Chee Tseng*, + , *T-C May 03* 545-557
efficient multipolling mechanism for IEEE 802.11 WLAN. *Shou-Chih Lo*, + , *T-C Jun 03* 764-778
performance enhancements of ad hoc networks with localized route fix. *Duggirala, R.*, + , *T-C Jul 03* 854-861
schedulability and perform. anal. of similarity stack protocol. *Tei-Wei Kuo*, + , *T-C May 03* 658-669
Access protocols; cf. Code division multiple access
Adders
deterministic BIST for RNS adders. *Vergos, H.T.*, + , *T-C Jul 03* 896-906
generalized earliest-first fast addition algorithm. *Yeh, W.-C.*, + , *T-C Oct 03* 1233-1242
modulo 2^n 1 adder design using select-prefix blocks. *Efstathiou, C.*, + , *T-C Nov 03* 1399-1406
Ad hoc networks
caching scheme for routing in mobile ad hoc ntgworks and its application to ZRP. *Beraldi, R.*, + , *T-C Aug 03* 1051-1062
coverage in wireless ad hoc sens. networks. *Xiang-Yang Li*, + , *T-C Jun 03* 753-763
nULLVALUE. *Petrioli, C.*, + , *T-C Jun 03* 779-790
performance enhancements of ad hoc networks with localized route fix. *Duggirala, R.*, + , *T-C Jul 03* 854-861
Algebra
constructing composite field representations for efficient conversion. *Sunar, B.*, + , *T-C Nov 03* 1391-1398
Algebra; cf. Galois fields; Polynomials
Algorithm theory
achieving NTRU with Montgomery multiplication. *O'Rourke, C.*, + , *T-C Apr 03* 440-448
Algorithm theory; cf. Computational complexity; Deterministic algorithms
Application program interfaces; cf. Middleware
Application specific integrated circuits
scalable dual-field ellipt. curve cryptographic proc. *Satoh, A.*, + , *T-C Apr 03* 449-460
Application specific integrated circuits; cf. System-on-chip
Arithmetic
tight upper bounds on the minimum precision required of divisor and partial remainder in high-radix division. *Parhami, B.*, *T-C Nov 03* 1509-1514
Arithmetic; cf. Digital arithmetic
Automatic testing; cf. Automatic test pattern generation
Automatic test pattern generation
nonscan design for testability for synchronous sequential circuits based on conflict resolution. *Dong Xiang*, + , *T-C Aug 03* 1063-1075

B

Batch processing (computers)
guaranteed throughput of multizone disks. *Michiels, W.*, + , *T-C Nov 03* 1407-1420
Binary codes
balanced codes, efficient encoding/decoding schemes. *Jong-Hoon Youn*, + , *T-C Sep 03* 1229-1232
constructing composite field representations for efficient conversion. *Sunar, B.*, + , *T-C Nov 03* 1391-1398
edge disjoint Hamiltonian cycles in k-Ary n-Cubes and hypercubes. *Bae, M.M.*, + , *T-C Oct 03* 1271-1284
Binary decision diagrams
BDD-based algorithm for analysis of multistate systems with multistate components. *Zang, X.*, + , *T-C Dec 03* 1608-1618
linearly transformed binary decision diags., efficient minimization/manipulation. *Gunther, W.*, + , *T-C Sep 03* 1196-1209
reduction of sizes of decision diags. by autocorrelation fns. *Karpovsky, M.G.*, + , *T-C May 03* 592-606
Bluetooth
nULLVALUE. *Petrioli, C.*, + , *T-C Jun 03* 779-790
Boolean algebra; cf. Boolean functions
Boolean functions
comment on "Generalized Reed-Muller forms as, tool to detect symms. *Faikowski, B.J.*, *T-C Jul 03* 975-976
efficient implement. of cryptographically useful "large" Boolean fns. *Sarkar, P.*, + , *T-C Apr 03* 410-417
reduction of sizes of decision diags. by autocorrelation fns. *Karpovsky, M.G.*, + , *T-C May 03* 592-606
Broadband networks
system modeling and perform. eval. of rate allocation schemes for packet data services in W-CDMA syst. *Yu-Kwong Kwok*, + , *T-C Jun 03* 804-814
Buffer storage
boost perform. of nets., source routing, applying in-transit buffers. *Flich, J.*, + , *T-C Sep 03* 1134-1153
novel reordering write buffer to improve write performance of log-structured file systems. *Wang, J.*, + , *T-C Dec 03* 1559-1572
redundant disk arrays, asynchronous scheu. *Sanders, P.*, *T-C Sep 03* 1170-1184
Buffer storage; cf. Cache storage
Built-in self test
deterministic BIST for RNS adders. *Vergos, H.T.*, + , *T-C Jul 03* 896-906
multiple-seed TPG structures. *Kagaris, D.*, *T-C Dec 03* 1633-1639
perfect fault coverage. *Chatterjee, M.*, + , *T-C Dec 03* 1543-1558

Business data processing; cf. Electronic commerce

C

Cache storage
cache coherence in intell. memory systs. *Keen, D., + , T-C Jul 03* 960-966
caching scheme for routing in mobile ad hoc networks and its application to ZRP. *Beraldi, R., + , T-C Aug 03* 1051-1062
intelligent cache syst. with hardware prefetching for high perform. *Jung-Hoon Lee, + , T-C May 03* 607-616
probabilistic miss eqns., memory hierarchy perform. evaluation. *Fraguela, B.B., + , T-C Mar 03* 321-336
switch MSHR, tech. to reduce rem. read memory access time in CC-NUMA multiprocessors. *Bhuyan, L.N., + , T-C May 03* 617-632
CAD; cf. Electronic design automation; Logic CAD
Cells (electric)
discharge current steering for battery lifetime optimization. *Benini, L., + , T-C Aug 03* 985-995
nonideal battery properties and their impact on software design for wearable computers. *Martin, T.L., + , T-C Aug 03* 979-984
Cellular arrays; cf. Systolic arrays
Cellular radio
composable proxy services to support collaboration on mobile Internet. *McKinley, P.K., + , T-C Jun 03* 713-726
Cellular radio; cf. Picocellular radio
Channel allocation
system modeling and perform. eval. of rate allocation schemes for packet data services in W-CDMA systs. *Yu-Kwong Kwok, + , T-C Jun 03* 804-814
Circuit CAD
redundant representation of GF(q^n) for designing arith. cct. *Geiselmann, W., + , T-C Jul 03* 848-853
test data compression and test resource partitioning for system-on-a-chip using frequency-directed run-length (FDR) codes. *Chandra, A., + , T-C Aug 03* 1076-1088
Circuit CAD; cf. Hardware description languages
Circuit layout; cf. Circuit layout CAD
Circuit layout CAD
exact routing with search space reduction. *Schmiedle, F., + , T-C Jun 03* 815-825
Circuit noise; cf. Integrated circuit noise
Circuit reliability
deterministic BIST for RNS adders. *Vergos, H.T., + , T-C Jul 03* 896-906
Circuit reliability; cf. Integrated circuit reliability
Circuit testing
nonscan design for testability for synchronous sequential circuits based on conflict resolution. *Dong Xiang, + , T-C Aug 03* 1063-1075
Circuit testing; cf. Integrated circuit testing
Client-server systems
two-version based concurrency control and recovery in real-time client/server databases. *Tei-Wei Kuo, + , T-C Apr 03* 506-524
user-level QoS-adaptive resource mgt. in server end-systs. *Abdelzaher, T.F., + , T-C May 03* 678-685
Client-server systems; cf. Middleware
CMOS digital integrated circuits; cf. CMOS logic circuits
CMOS integrated circuits
CMOS VLSI implementation of low-power logarithmic converter. *Abed, K.H., + , T-C Nov 03* 1421-1433
highly regular and scalable AES hardware archit. *Mangard, S., + , T-C Apr 03* 483-491
high-speed oscillator-based truly random no. source for cryptographic appls. on smart card IC. *Bucci, M., + , T-C Apr 03* 403-409
IC bridge fault modeling for IP blocks using neural network-based VHDL saboteurs. *Shaw, D.B., + , T-C Oct 03* 1285-1297
scalable dual-field ellipt. curve cryptographic proc. *Satoh, A., + , T-C Apr 03* 449-460
CMOS logic circuits
deterministic BIST for RNS adders. *Vergos, H.T., + , T-C Jul 03* 896-906
low-power antilogarithmic converter, VLSI implement. *Abed, K.H., + , T-C Sep 03* 1221-1228
Code division multiple access
system modeling and perform. eval. of rate allocation schemes for packet data services in W-CDMA systs. *Yu-Kwong Kwok, + , T-C Jun 03* 804-814
Codes; cf. Binary codes; Convolutional codes; Cyclic redundancy check codes; Error correction codes; Error detection codes; Gray codes; Hamming codes; Reed-Muller codes; Runlength codes
Combinational circuits
low-power antilogarithmic converter, VLSI implement. *Abed, K.H., + , T-C Sep 03* 1221-1228
Compressibility
class-based decompressor design for compressed instruction memory in embedded processors. *Weiss, S., + , T-C Nov 03* 1495-1500
Computational complexity
comments on "A fast and efficient proc. allocation scheme for mesh-connected multicomputers". *Lu Zhang, T-C Feb 03* 255-256
coverage in wireless ad hoc sens. networks. *Xiang-Yang Li, + , T-C Jun 03* 753-763
disk arrays, complexity of retrieval problems, random redundant storage. *Aerts, J., + , T-C Sep 03* 1210-1214
fault-tolerant scheduling algm. for real-time periodic tasks with possible software faults. *Ching-Chih Han, + , T-C Mar 03* 362-372
isomorphic strategy for proc. allocation in k-ary n-cube systs. *Moonsoo Kang, + , T-C May 03* 645-657
low complexity multiplication in finite field using ring representation. *Katti, R., + , T-C Apr 03* 418-427
parallel multipliers based on special irreducible pentanomials. *Rodriguez-Henriquez, F., + , T-C Dec 03* 1535-1542
utilization bound revisited. *Deji Chen, + , T-C Mar 03* 351-361
Computational geometry
coverage in wireless ad hoc sens. networks. *Xiang-Yang Li, + , T-C Jun 03* 753-763
Computation theory; cf. Algorithm theory
Computer applications
cryptographic hardware and embedded systems (special section). *T-C Apr 03* 401-505
cryptographic hardware and embedded systems (special section intro.). *Koc, C.K., + , T-C Apr 03* 401-402
failure-detecting arithmetic convolutional codes and iterative correcting strategy. *Redinbo, G.R., T-C Nov 03* 1434-1442
Computer applications; cf. Multimedia systems; Publishing
Computer architecture
achieving NTRU with Montgomery multiplication. *O'Rourke, C., + , T-C Apr 03* 440-448
cryptographic hardware and embedded systems (special section). *T-C Apr 03* 401-505
cryptographic hardware and embedded systems (special section intro.). *Koc, C.K., + , T-C Apr 03* 401-402
decoupled predictor-directed stream prefetching archit. *Sair, S., + , T-C Mar 03* 260-276
reliable distributed systems (special issue). *T-C Feb 03* 97-256
reliable distributed systems (special issue intro.). *Upadhyaya, S.J., + , T-C Feb 03* 97-98
Computer architecture; cf. Memory architecture; Parallel architectures; Reconfigurable architectures
Computer graphics
effective pixel rasterization pipeline architecture for 3D rendering processors. *Park, W.-C., + , T-C Nov 03* 1501-1508
Computer graphics; cf. Rendering (computer graphics)
Computer interfaces; cf. System buses
Computer network reliability
performance enhancements of ad hoc networks with localized route fix. *Duggirala, R., + , T-C Jul 03* 854-861
reliable real-time commun. in cooperative mobile appls. *Nett, E., + , T-C Feb 03* 166-180
Computer networks
perfect failure detect. in timed asynchronous systs. *Fetzer, C., T-C Feb 03* 99-112
self-modifiable color Petri nets for modeling user manipulation and network event handling. *Sheng-Uei Guan, + , T-C Jul 03* 920-932
Computer networks; cf. Computer network reliability
Computer power supplies
discharge current steering for battery lifetime optimization. *Benini, L., + , T-C Aug 03* 985-995
nonideal battery properties and their impact on software design for wearable computers. *Martin, T.L., + , T-C Aug 03* 979-984
Computers
wearable computers (special section). *T-C Aug 03* 977-1014
wearable computers (special section intro.). *Smailagic, A., T-C Aug 03* 977-978
Computers; cf. Digital computers
Computer software; cf. Subroutines
Concurrency control
maintaining temporal consistency of discrete objs. in soft real-time database systs. *Ben Kao, + , T-C Mar 03* 373-389
quantification of aborting effect for real-time data accesses. *Ming-Chung Liang, + , T-C May 03* 670-675
rate monotonic anal., hyperb. bound. *Bini, E., + , T-C Jul 03* 933-942
schedulability and perform. anal. of similarity stack protocol. *Tei-Wei Kuo, + , T-C May 03* 658-669
two-version based concurrency control and recovery in real-time client/server databases. *Tei-Wei Kuo, + , T-C Apr 03* 506-524
Content management
market-based resource allocation for content delivery in the Internet. *Ercetin, O., + , T-C Dec 03* 1573-1585
Controller area networks
reliable real-time communication in CAN networks. *Pinho, L.M., + , T-C Dec 03* 1594-1607
Convolutional codes
failure-detecting arithmetic convolutional codes and iterative correcting strategy. *Redinbo, G.R., T-C Nov 03* 1434-1442
Cooperative systems; cf. Multi-agent systems
Cryptography
analysis of stat. cipher feedback mode of block ciphers. *Heys, H.M., T-C Jan 03* 77-92
cryptographic hardware and embedded systems (special section). *T-C Apr 03* 401-505
cryptographic hardware and embedded systems (special section intro.). *Koc, C.K., + , T-C Apr 03* 401-402
efficient implement. of cryptographically useful "large" Boolean fns. *Sarkar, P., + , T-C Apr 03* 410-417
efficient multiplication beyond optimal normal bases. *Reyhani-Masoleh, A., + , T-C Apr 03* 428-439
efficient uses of FPGAs for implement. of DES and expt. lin. cryptanalysis. *Rouvroy, G., + , T-C Apr 03* 473-482
error anal. and detect. procedures for hardware implement. of advanced encryption std. *Bertoni, G., + , T-C Apr 03* 492-505
fast normal basis multiplication using general purpose processors. *Reyhani-Masolek, A., + , T-C Nov 03* 1379-1390
highly regular and scalable AES hardware archit. *Mangard, S., + , T-C Apr 03* 483-491
high-speed oscillator-based truly random no. source for cryptographic appls. on smart card IC. *Bucci, M., + , T-C Apr 03* 403-409
modular multiplication, Montgomery's algm., scalable archit. *Tenca, A.F., + , T-C Sep 03* 1215-1221
sustaining availability of Web services under distributed denial of service attacks. *Jun Xu, + , T-C Feb 03* 195-208
Cryptography; cf. Public key cryptography
Cyclic redundancy check codes
parallel CRC realization. *Campobello, G., + , T-C Oct 03* 1312-1319

D

Database management systems
quantification of aborting effect for real-time data accesses. *Ming-Chung Liang, + , T-C May 03* 670-675
schedulability and perform. anal. of similarity stack protocol. *Tei-Wei Kuo, + , T-C May 03* 658-669
two-version based concurrency control and recovery in real-time client/server databases. *Tei-Wei Kuo, + , T-C Apr 03* 506-524
Database management systems; cf. Temporal databases
Data communication
parallel CRC realization. *Campobello, G., + , T-C Oct 03* 1312-1319
Data compression
efficient data compression methods for multidimensional sparse array operations based on the EKMR scheme. *Lin, C.-Y., + , T-C Dec 03* 1640-1646
test data compression and test resource partitioning for system-on-a-chip using frequency-directed run-length (FDR) codes. *Chandra, A., + , T-C Aug 03* 1076-1088
Data flow analysis
balancing reuse opportunities and performance gains with subblock value reuse. *Jian Huang, + , T-C Aug 03* 1032-1050
Data flow computing
disproving perfect-rate property of data-flow graphs unfolded by least common multiple of no. of loop register. *Wolz, F., + , T-C May 03* 688
Data flow graphs
disproving perfect-rate property of data-flow graphs unfolded by least common multiple of no. of loop register. *Wolz, F., + , T-C May 03* 688

Data integrity
aQuA, adaptive archit. that provides dependable distributed objs. *Yansong Ren, + , T-C Jan 03* 31-50
maintaining temporal consistency of discrete objs. in soft real-time database systs. *Ben Kao, + , T-C Mar 03* 373-389
Data structures
linearly transformed binary decision diags., efficient minimization/manipulation. *Gunther, W., + , T-C Sep 03* 1196-1209
Decision diagrams
exact routing with search space reduction. *Schmiedle, F., + , T-C Jun 03* 815-825
Decision diagrams; cf. Binary decision diagrams
Decision support systems
maintaining temporal consistency of discrete objs. in soft real-time database systs. *Ben Kao, + , T-C Mar 03* 373-389
Decision theory
new scheme for link and signaling costs reduction in mobile IP. *Lee, Y.J., + , T-C Jun 03* 706-712
Decision trees
synthesis of easily testable (k, K) circuits. *Naidu, S.R., + , T-C Nov 03* 1490-1494
Decoding
balanced codes, efficient encoding/decoding schemes. *Jong-Hoon Youn, + , T-C Sep 03* 1229-1232
transmission time anal. for parallel asynchronous commun. scheme. *Tallini, L.G., + , T-C May 03* 558-571
Design engineering; cf. Design for testability
Design for testability
nonscan design for testability for synchronous sequential circuits based on conflict resolution. *Dong Xiang, + , T-C Aug 03* 1063-1075
Deterministic algorithms
tolerant and deadlock-free routing protocol, 2D meshes, odd-even turn model. *Jie Wu, T-C Sep 03* 1154-1169
Diagrams; cf. Decision diagrams
Digital arithmetic
CMOS VLSI implementation of low-power logarithmic converter. *Abed, K.H., + , T-C Nov 03* 1421-1433
fast normal basis multiplication using general purpose processors. *Reyhani-Masoleh, A., + , T-C Nov 03* 1379-1390
modular multiplication, Montgomery's algm., scalable archit. *Tenca, A.F., + , T-C Sep 03* 1215-1221
modulo 2^n-1 adder design using select-prefix blocks. *Efstathiou, C., + , T-C Nov 03* 1399-1406
radix-4 reciprocal sq.-root and combination, division and sq. root. *Lang, T., + , T-C Sep 03* 1100-1114
tight upper bounds on the minimum precision required of divisor and partial remainder in high-radix division. *Parhami, B., T-C Nov 03* 1509-1514
Digital arithmetic; cf. Floating point arithmetic; Redundant number systems; Residue number systems
Digital circuits; cf. Adders
Digital computers
generalized earliest-first fast addition algorithm. *Yeh, W.-C., + , T-C Oct 03* 1233-1242
Digital computers; cf. File servers
Digital integrated circuits; cf. Integrated logic circuits; Microprocessor chips
Digital signal processing chips
analysis and FPGA implement. of image restoration under resource constraints. *Memik, S.O., + , T-C Mar 03* 390-399
low-power antilogarithmic converter, VLSI implement. *Abed, K.H., + , T-C Sep 03* 1221-1228
scalable dual-field ellipt. curve cryptographic proc. *Satoh, A., + , T-C Apr 03* 449-460
Digital simulation; cf. Virtual machines
Digital storage; cf. Buffer storage
Digital systems; cf. Computer networks; Multiprocessing systems; Real-time systems; Smart cards
Directed graphs
minimum register instruction sequencing to reduce register spills in out-of-order issue superscalar archits. *Govindarajan, R., + , T-C Jan 03* 4-20
Directed graphs; cf. Petri nets
Direct energy conversion; cf. Cells (electric)
Disk storage; cf. Magnetic disk storage; RAID
Display instrumentation; cf. Head-up displays; Three-dimensional displays
Distributed algorithms
coverage in wireless ad hoc sens. networks. *Xiang-Yang Li, + , T-C Jun 03* 753-763
Distributed algorithms; cf. Parallel algorithms
Distributed databases; cf. Replicated databases
Distributed memory systems
performability eval. of multipurpose multiprocessor systs., "separation of concerns" approach. *Rabah, M., + , T-C Feb 03* 223-236
Distributed memory systems; cf. Distributed shared memory systems
Distributed object management
aQuA, adaptive archit. that provides dependable distributed objs. *Yansong Ren, + , T-C Jan 03* 31-50
deno, a decentralized, peer-to-peer obj.-replication syst. for weakly connected environ. *Cetintemel, U., + , T-C Jul 03* 943-959
reflective fault-tolerant systs., experience to challenges. *Ruiz, J.C., + , T-C Feb 03* 237-254
Distributed processing
phys. and software-implemented fault injection techs., comp. *Arlat, J., + , T-C Sep 03* 1115-1133
reliable distributed systems (special issue). *T-C Feb 03* 97-256
reliable distributed systems (special issue intro.). *Upadhyaya, S.J., + , T-C Feb 03* 97-98
transparent recovery from intermittent faults in time-triggered distributed systs. *Kandasamy, N., + , T-C Feb 03* 113-125
Distributed processing; cf. Client-server systems; Computer networks; Distributed algorithms; Distributed object management; Mobile computing; Multiprocessing systems; Network operating systems; Parallel processing; Pipeline processing; Processor scheduling
Distributed programming; cf. Parallel programming
Distributed shared memory systems
latency, occupancy, and bandwidth in DSM multiprocessors, a perform. eval. *Chaudhuri, M., + , T-C Jul 03* 862-880
Distribution networks
reliable distributed systems (special issue). *T-C Feb 03* 97-256
reliable distributed systems (special issue intro.). *Upadhyaya, S.J., + , T-C Feb 03* 97-98
DRAM chips
cache coherence in intell. memory systs. *Keen, D., + , T-C Jul 03* 960-966
class of random multiple bits in byte error correcting and single byte error detecting (S_8b/EC-S_8ED) codes. *Umanesan, G., + , T-C Jul 03* 835-847
static and dyn. behavior of memory cell array spot defects in embedded DRAMs. *Al-Ars, Z., + , T-C Mar 03* 293-309
Dynamic programming; cf. Integer programming

E

EFTS; cf. Electronic commerce
Electrical faults
adaptive algorithms for maximal diagnosis of wiring interconnects. *Feng, W.-Y., + , T-C Oct 03* 1259-1270
Electric variables control; cf. Voltage control
Electrochemical devices; cf. Cells (electric)
Electronic commerce
performability eval. of multipurpose multiprocessor systs., "separation of concerns" approach. *Rabah, M., + , T-C Feb 03* 223-236
Electronic design automation
evaluating integrated hardware-software optim. using, unified energy estim. framework. *Vijaykrishnan, N., + , T-C Jan 03* 59-76
Electronic design automation; cf. Circuit CAD; Circuit layout CAD
Electronic engineering; cf. Low-power electronics
Electronic engineering computing; cf. Electronic design automation; Logic CAD
Electronic equipment testing; cf. Circuit testing
Electronic publishing; cf. Content management
Embedded systems
class-based decompressor design for compressed instruction memory in embedded processors. *Weiss, S., + , T-C Nov 03* 1495-1500
cryptographic hardware and embedded systems (special section). *T-C Apr 03* 401-505
cryptographic hardware and embedded systems (special section intro.). *Koc, C.K., + , T-C Apr 03* 401-402
error anal. and detect. procedures for hardware implement. of advanced encryption std. *Bertoni, G., + , T-C Apr 03* 492-505
modeling, analysis, and self-management of electronic textiles. *Stanley-Marbell, P.S., + , T-C Aug 03* 996-1010
performance and energy consumption of embedded real-time operating systems. *Baynes, K., + , T-C Nov 03* 1454-1469
predicting defect-tolerant yield in embedded core context. *Meyer, J., + , T-C Nov 03* 1470-1479
scalable dual-field ellipt. curve cryptographic proc. *Satoh, A., + , T-C Apr 03* 449-460
static and dyn. behavior of memory cell array spot defects in embedded DRAMs. *Al-Ars, Z., + , T-C Mar 03* 293-309
voltage-clock-scaling adaptive scheduling techniques for low power in hard real-time systems. *Krishna, C.M., + , T-C Dec 03* 1594-1607
Encoding
transmission time anal. for parallel asynchronous commun. scheme. *Tallini, L.G., + , T-C May 03* 558-571
Energy conservation
evaluating integrated hardware-software optim. using, unified energy estim. framework. *Vijaykrishnan, N., + , T-C Jan 03* 59-76
Energy resources; cf. Energy conservation
Engineering computing; cf. Virtual machines
Entropy
test data compression and test resource partitioning for system-on-a-chip using frequency-directed run-length (FDR) codes. *Chandra, A., + , T-C Aug 03* 1076-1088
Error analysis
error anal. and detect. procedures for hardware implement. of advanced encryption std. *Bertoni, G., + , T-C Apr 03* 492-505
tests and tolerances for high-perform. software-implemehted fault detect. *Turmon, M., + , T-C May 03* 579-591
Error correction
class of random multiple bits in byte error correcting and single byte error detecting (S_8b/EC-S_8ED) codes. *Umanesan, G., + , T-C Jul 03* 835-847
Error correction; cf. Forward error correction
Error correction codes
class of random multiple bits in byte error correcting and single byte error detecting (S_8b/EC-S_8ED) codes. *Umanesan, G., + , T-C Jul 03* 835-847
composable proxy services to support collaboration on mobile Internet. *McKinley, P.K., + , T-C Jun 03* 713-726
low complexity multiplication in finite field using ring representation. *Katti, R., + , T-C Apr 03* 418-427
Error detection
class of random multiple bits in byte error correcting and single byte error detecting (S_8b/EC-S_8ED) codes. *Umanesan, G., + , T-C Jul 03* 835-847
error anal. and detect. procedures for hardware implement. of advanced encryption std. *Bertoni, G., + , T-C Apr 03* 492-505
parallel CRC realization. *Campobello, G., + , T-C Oct 03* 1312-1319
Error detection codes
class of random multiple bits in byte error correcting and single byte error detecting (S_8b/EC-S_8ED) codes. *Umanesan, G., + , T-C Jul 03* 835-847
transmission time anal. for parallel asynchronous commun. scheme. *Tallini, L.G., + , T-C May 03* 558-571
Errors; cf. Roundoff errors
Estimation theory; cf. Sequential estimation

F

Failure analysis
failure-detecting arithmetic convolutional codes and iterative correcting strategy. *Redinbo, G.R., T-C Nov 03* 1434-1442
Fault diagnosis
BDD-based algorithm for analysis of multistate systems with multistate components. *Zang, X., + , T-C Dec 03* 1608-1618
perfect fault coverage. *Chatterjee, M., + , T-C Dec 03* 1543-1558
(t, k)-diagnosable syst., a generalization of the PMC models. *Araki, T., + , T-C Jul 03* 971-975
zero-aliasing space compaction of test responses using single periodic output. *Bhattacharya, B.B., + , T-C Dec 03* 1646-1651
Fault tolerance
enhances cluster k-Ary n-Cube, fault-tolerant multiprocessor. *Izadi, B.A., + , T-C Nov 03* 1443-1453
extended fault-tolerant link-state routing protocol in the Internet. *Wu, J., + , T-C Oct 03* 1298-1311
IC bridge fault modeling for IP blocks using neural network-based VHDL saboteurs. *Shaw, D.B., + , T-C Oct 03* 1285-1297
optimal fixed-priority assignment algorithm for supporting fault-tolerant hard real-time systems. *De A. Lima, G.M., + , T-C Oct 03* 1332-1346
reliable distributed systems (special issue). *T-C Feb 03* 97-256

+ Check author entry for coauthors

reliable distributed systems (special issue intro.). *Upadhyaya, S.J.*, + , *T-C Feb 03* 97-98
reliable real-time communication in CAN networks. *Pinho, L.M.*, + , *T-C Dec 03* 1594-1607
systematic method for modifying march tests for bit-oriented memories into tests for word-oriented memories. *Van de Goor, A.J.*, + , *T-C Oct 03* 1320-1331

Fault tolerance; cf. Fault tolerant computing

Fault tolerant computing
building survivable services using redundancy and adaptation. *Hiltunen, M.A.*, + , *T-C Feb 03* 181-194
fault-tolerant mobile agent execution. *Pleisch, S.*, + , *T-C Feb 03* 209-222
fault-tolerant scheduling algm. for real-time periodic tasks with possible software faults. *Ching-Chih Han*, + , *T-C Mar 03* 362-372
modeling, analysis, and self-management of electronic textiles. *Stanley-Marbell, P.S.*, + , *T-C Aug 03* 996-1010
multigrid method, algm.-based error detect. scheme. *Mishra, A.*, + , *T-C Sep 03* 1089-1099
perfect failure detect. in timed asynchronous systs. *Fetzer, C.*, *T-C Feb 03* 99-112
phys. and software-implemented fault injection techs., comp. *Arlat, J.*, + , *T-C Sep 03* 1115-1133
process recovery in heterog. systs. *Kuo-Feng Ssu*, + , *T-C Feb 03* 126-138
rectilinear-monotone polygonal fault block model for fault-tolerant min. routing in mesh. *Dajin Wang*, *T-C Mar 03* 310-320
redundant disk arrays, asynchronous sched. *Sanders, P.*, *T-C Sep 03* 1170-1184
reflective fault-tolerant systs., experience to challenges. *Ruiz, J.C.*, + , *T-C Feb 03* 237-254
reliable real-time commun. in cooperative mobile appls. *Nett, E.*, + , *T-C Feb 03* 166-180
rSA speedup with Chinese remainder theorem immune against hardware fault cryptanalysis. *Sung-Ming Yen*, + , *T-C Apr 03* 461-472
tests and tolerances for high-perform. software-implemehted fault detect. *Turmon, M.*, + , *T-C May 03* 579-591
(t, k)-diagnosable syst., a generalization of the PMC models. *Araki, T.*, + , *T-C Jul 03* 971-975
tolerant and deadlock-free routing protocol, 2D meshes, odd-even turn model. *Jie Wu*, *T-C Sep 03* 1154-1169
transparent recovery from intermittent faults in time-triggered distributed systs. *Kandasamy, N.*, + , *T-C Feb 03* 113-125
what designers of bus and network archits. should, about hypercubes. *LaForge, L.E.*, + , *T-C Apr 03* 525-544

Fault tolerant computing; cf. Software fault tolerance

Feedback
analysis of stat. cipher feedback mode of block ciphers. *Heys, H.M.*, *T-C Jan 03* 77-92
multiple-seed TPG structures. *Kagaris, D.*, *T-C Dec 03* 1633-1639
RACCOOM, rate-based congestion control approach for multicast. *Gao, Y.*, + , *T-C Dec 03* 1521-1534

Field programmable gate arrays
analysis and FPGA implement. of image restoration under resource constraints. *Memik, S.O.*, + , *T-C Mar 03* 390-399
combining temporal partitioning and sharing of functional units in compilation for reconfigurable architectures. *Cardoso, J.M.P.*, *T-C Oct 03* 1362-1375
efficient uses of FPGAs for implement. of DES and expt. lin. cryptanalysis. *Rouvroy, G.*, + , *T-C Apr 03* 473-482
general models and reduction design tech. for FPGA switch box designs. *Hongbing Fan*, + , *T-C Jan 03* 21-30

File organization
novel reordering write buffer to improve write performance of log-structured file systems. *Wang, J.*, + , *T-C Dec 03* 1559-1572

File organization; cf. Database management systems; Data structures; Storage management

File servers
incremental server for scheduling overloaded real-time systems. *Mejia-Alvarez, P.*, + , *T-C Oct 03* 1347-1361
user-level QoS-adaptive resource mgt. in server end-systs. *Abdelzaher, T.F.*, + , *T-C May 03* 678-685

Finite difference methods
multigrid method, algm.-based error detect. scheme. *Mishra, A.*, + , *T-C Sep 03* 1089-1099

Finite element analysis
multigrid method, algm.-based error detect. scheme. *Mishra, A.*, + , *T-C Sep 03* 1089-1099

Finite element analysis; cf. Mesh generation

Floating point arithmetic
CMOS VLSI implementation of low-power logarithmic converter. *Abed, K.H.*, + , *T-C Nov 03* 1421-1433

Flow graphs; cf. Data flow graphs

Formal logic; cf. Boolean functions

Formal verification
linearly transformed binary decision diags., efficient minimization/manipulation. *Gunther, W.*, + , *T-C Sep 03* 1196-1209

Forward error correction
composable proxy services to support collaboration on mobile Internet. *McKinley, P.K.*, + , *T-C Jun 03* 713-726

Frequency converters; cf. Frequency multipliers

Frequency multipliers
parallel multipliers based on special irreducible pentanomials. *Rodriguez-Henriquez, F.*, + , *T-C Dec 03* 1535-1542

Functions; cf. Boolean functions

G

Galois fields
parallel multipliers based on special irreducible pentanomials. *Rodriguez-Henriquez, F.*, + , *T-C Dec 03* 1535-1542
redundant representation of GF(q^n) for designing arith. ccts. *Geiselmann, W.*, + , *T-C Jul 03* 848-853
scalable dual-field ellipt. curve cryptographic proc. *Satoh, A.*, + , *T-C Apr 03* 449-460

Game theory
market-based resource allocation for content delivery in the Internet. *Ercetin, O.*, + , *T-C Dec 03* 1573-1585
sustaining availability of Web services under distributed denial of service attacks. *Jun Xu*, + , *T-C Feb 03* 195-208

Geometry; cf. Computational geometry

Graph coloring
self-modifiable color Petri nets for modeling user manipulation and network event handling. *Sheng-Uei Guan*, + , *T-C Jul 03* 920-932

Graph theory; cf. Directed graphs; Graph coloring

Gray codes
edge disjoint Hamiltonian cycles in k-Ary n-Cubes and hypercubes. *Bae, M.M.*, + , *T-C Oct 03* 1271-1284

Groupware
composable proxy services to support collaboration on mobile Internet. *McKinley, P.K.*, + , *T-C Jun 03* 713-726

H

Hamming codes
what designers of bus and network archits. should, about hypercubes. *LaForge, L.E.*, + , *T-C Apr 03* 525-544

Hard disks
guaranteed throughput of multizone disks. *Michiels, W.*, + , *T-C Nov 03* 1407-1420

Hardware description languages
IC bridge fault modeling for IP blocks using neural network-based VHDL saboteurs. *Shaw, D.B.*, + , *T-C Oct 03* 1285-1297
parallel CRC realization. *Campobelio, G.*, + , *T-C Oct 03* 1312-1319

Hardware-software codesign
evaluating integrated hardware-software optim. using, unified energy estim. framework. *Vijaykrishnan, N.*, + , *T-C Jan 03* 59-76

Head-up displays
using physical context for just-in-time information retrieval. *Rhodes, B.*, *T-C Aug 03* 1011-1014

High level synthesis; cf. Hardware-software codesign

Hypercube networks
edge disjoint Hamiltonian cycles in k-Ary n-Cubes and hypercubes. *Bae, M.M.*, + , *T-C Oct 03* 1271-1284
enhances cluster k-Ary n-Cube, fault-tolerant multiprocessor. *Izadi, B.A.*, + , *T-C Nov 03* 1443-1453
what designers of bus and network archits. should, about hypercubes. *LaForge, L.E.*, + , *T-C Apr 03* 525-544

Hypermedia
performance of IP-based services over GPRS. *Chitre, V.A.*, + , *T-C Jun 03* 727-741

I

IEEE
list of reviewers, 2002. *T-C Jan 03* 93-96

IEEE standards
reliable real-time commun. in cooperative mobile appls. *Nett, E.*, + , *T-C Feb 03* 166-180
wireless Internet (special section). *T-C Jun 03* 689-814
wireless Internet (special section intro.). *Yi-Bing Lin*, + , *T-C Jun 03* 689

Image reconstruction; cf. Image restoration

Image restoration
analysis and FPGA implement. of image restoration under resource constraints. *Memik, S.O.*, + , *T-C Mar 03* 390-399

Information networks; cf. Internet

Information resources; cf. Web sites

Information retrieval
using physical context for just-in-time information retrieval. *Rhodes, B.*, *T-C Aug 03* 1011-1014
wearable computers (special section). *T-C Aug 03* 977-1014
wearable computers (special section intro.). *Smailagic, A.*, *T-C Aug 03* 977-978

Information retrieval; cf. Query processing

Information science; cf. Information retrieval; Information storage

Information storage
market-based resource allocation for content delivery in the Internet. *Ercetin, O.*, + , *T-C Dec 03* 1573-1585

Information systems; cf. Database management systems

Information theory; cf. Decoding; Encoding; Entropy; Prediction theory

Input-output programs
novel reordering write buffer to improve write performance of log-structured file systems. *Wang, J.*, + , *T-C Dec 03* 1559-1572

Instruction sets
balancing reuse opportunities and performance gains with subblock value reuse. *Jian Huang*, + , *T-C Aug 03* 1032-1050
variable instruction set archit. and compiler support. *Liu, J.*, + , *T-C Jul 03* 881-895

Integer programming
minimum register instruction sequencing to reduce register spills in out-of-order issue superscalar archits. *Govindarajan, R.*, + , *T-C Jan 03* 4-20

Integrated circuit design
test data compression and test resource partitioning for system-on-a-chip using frequency-directed run-length (FDR) codes. *Chandra, A.*, + , *T-C Aug 03* 1076-1088

Integrated circuit manufacture; cf. Integrated circuit yield

Integrated circuit noise
high-speed oscillator-based truly random no. source for cryptographic appls. on smart card IC. *Bucci, M.*, + , *T-C Apr 03* 403-409

Integrated circuit reliability
class of random multiple bits in byte error correcting and single byte error detecting (S,b/EC-S_bED) codes. *Umanesan, G.*, + , *T-C Jul 03* 835-847

Integrated circuits
IC bridge fault modeling for IP blocks using neural network-based VHDL saboteurs. *Shaw, D.B.*, + , *T-C Oct 03* 1285-1297
predicting defect-tolerant yield in embedded core context. *Meyer, J.*, + , *T-C Nov 03* 1470-1479

Integrated circuit testing
test data compression and test resource partitioning for system-on-a-chip using frequency-directed run-length (FDR) codes. *Chandra, A.*, + , *T-C Aug 03* 1076-1088

Integrated circuit yield
predicting defect-tolerant yield in embedded core context. *Meyer, J.*, + , *T-C Nov 03* 1470-1479

Integrated logic circuits
high-speed oscillator-based truly random no. source for cryptographic appls. on smart card IC. *Bucci, M.*, + , *T-C Apr 03* 403-409

Integrated memory circuits; cf. DRAM chips

Interactive video; cf. Video on demand

Internet
composable proxy services to support collaboration on mobile Internet. *McKinley, P.K.*, + , *T-C Jun 03* 713-726
extended fault-tolerant link-state routing protocol in the Internet. *Wu, J.*, + , *T-C Oct 03* 1298-1311
market-based resource allocation for content delivery in the Internet. *Ercetin, O.*, + , *T-C Dec 03* 1573-1585
new scheme for link and signaling costs reduction in mobile IP. *Lee, Y.J.*, + , *T-C Jun 03* 706-712

peer-to-peer membership mgt. for gossip-based protocols. *Ganesh, A.J., + , T-C Feb 03* 139-149
performability eval. of multipurpose multiprocessor systs., "separation of concerns" approach. *Rabah, M., + , T-C Feb 03* 223-236
performance of IP-based services over GPRS. *Chitre, V.A., + , T-C Jun 03* 727-741
RACCOOM, rate-based congestion control approach for multicast. *Gao, Y., + , T-C Dec 03* 1521-1534
system modeling and perform. eval. of rate allocation schemes for packet data services in W-CDMA systs. *Yu-Kwong Kwok, + , T-C Jun 03* 804-814
user-level QoS-adaptive resource mgt. in server end-systs. *Abdelzaher, T.F., + , T-C May 03* 678-685
wireless Internet (special section). *T-C Jun 03* 689-814
wireless Internet (special section intro.). *Yi-Bing Lin, + , T-C Jun 03* 689
Internet; cf. Internet telephony
Internet telephony
mobile agent-based advanced service archit. for wireless Internet telephony, design, implement., and eval. *Emako, B., + , T-C Jun 03* 690-705
performance optim. of VoIP calls over wireless links using H.323 protocol. *Das, S.K., + , T-C Jun 03* 742-752
Interpolation
multigrid method, algm.-based error detect. scheme. *Mishra, A., + , T-C Sep 03* 1089-1099
Iterative methods
analysis and FPGA implement. of image restoration under resource constraints. *Memik, S.O., + , T-C Mar 03* 390-399
exact routing with search space reduction. *Schmiedle, F., + , T-C Jun 03* 815-825
failure-detecting arithmetic convolutional codes and iterative correcting strategy. *Redinbo, G.R., T-C Nov 03* 1434-1442
multigrid method, algm.-based error detect. scheme. *Mishra, A., + , T-C Sep 03* 1089-1099
radix-4 reciprocal sq.-root and combination, division and sq. root. *Lang, T., + , T-C Sep 03* 1100-1114

J

Java
mobile agent-based advanced service archit. for wireless Internet telephony, design, implement., and eval. *Emako, B., + , T-C Jun 03* 690-705
Jitter
high-speed oscillator-based truly random no. source for cryptographic appls. on smart card IC. *Bucci, M., + , T-C Apr 03* 403-409
many-to-many multicast routing with temporal QoS guarantees. *Hung-Ying Tyan, + , T-C Jun 03* 826-832

K

Knowledge based systems; cf. Software agents

L

Land mobile radio; cf. Cellular radio
Linear algebra; cf. Matrix algebra
Linear programming
minimum register instruction sequencing to reduce register spills in out-of-order issue superscalar archits. *Govindarajan, R., + , T-C Jan 03* 4-20
Local area networks; cf. Controller area networks; Wireless LAN; Workstation clusters
Logic; cf. Logic design; Logic testing
Logic arrays; cf. Programmable logic arrays
Logic CAD
general models and reduction design tech. for FPGA switch box designs. *Hongbing Fan, + , T-C Jan 03* 21-30
linearly transformed binary decision diags., efficient minimization/manipulation. *Gunther, W., + , T-C Sep 03* 1196-1209
Logic circuits; cf. Combinational circuits; Integrated logic circuits; Sequential circuits
Logic design
nonscan design for testability for synchronous sequential circuits based on conflict resolution. *Dong Xiang, + , T-C Aug 03* 1063-1075
Logic design; cf. Logic CAD
Logic devices; cf. Logic gates; Programmable logic devices
Logic gates
low complexity multiplication in finite field using ring representation. *Katti, R., + , T-C Apr 03* 418-427
Logic testing
deterministic BIST for RNS adders. *Vergos, H.T., + , T-C Jul 03* 896-906
nonscan design for testability for synchronous sequential circuits based on conflict resolution. *Dong Xiang, + , T-C Aug 03* 1063-1075
zero-aliasing space compaction of test responses using single periodic output. *Bhattacharya, B.B., + , T-C Dec 03* 1646-1651
Low-power electronics
CMOS VLSI implementation of low-power logarithmic converter. *Abed, K.H., + , T-C Nov 03* 1421-1433
high-speed oscillator-based truly random no. source for cryptographic appls. on smart card IC. *Bucci, M., + , T-C Apr 03* 403-409
voltage-clock-scaling adaptive scheduling techniques for low power in hard real-time systems. *Krishna, C.M., + , T-C Dec 03* 1594-1607

M

Machine oriented languages; cf. Instruction sets
Magnetic disk storage
modeling/dimensioning hierarchical storage systs. for low-delay video services. *Chan, S.-H.G., + , T-C Jul 03* 907-919
Magnetic disk storage; cf. Hard disks
Magnetic storage; cf. Magnetic disk storage
Management
wireless Internet (special section). *T-C Jun 03* 689-814
wireless Internet (special section intro.). *Yi-Bing Lin, + , T-C Jun 03* 689
Management; cf. Content management
Management information systems; cf. Decision support systems
Marketing
market-based resource allocation for content delivery in the Internet. *Ercetin, O., + , T-C Dec 03* 1573-1585
Mathematical operators
multigrid method, algm.-based error detect. scheme. *Mishra, A., + , T-C Sep 03* 1089-1099
Mathematical programming; cf. Linear programming
Mathematics; cf. Algebra; Arithmetic; Mathematical operators; Probability
Matrix algebra
computing packet loss probabilities in MUX models using rational approx. *Cuyt, A., + , T-C May 03* 633-644
Matrix algebra; cf. Matrix multiplication; Sparse matrices
Matrix multiplication
efficient multiplication beyond optimal normal bases. *Reyhani-Masolch, A., + , T-C Apr 03* 428-439
Measurement
parallel multipliers based on special irreducible pentanomials. *Rodriguez-Henriquez, F., + , T-C Dec 03* 1535-1542
Mechanical properties; cf. Compressibility
Memory architecture
dynamically tunable memory hierarchy. *Balasubramonian, R., + , T-C Oct 03* 1243-1258
modeling/dimensioning hierarchical storage systs. for low-delay video services. *Chan, S.-H.G., + , T-C Jul 03* 907-919
switch MSHR, tech. to reduce rem. read memory access time in CC-NUMA multiprocessors. *Bhuyan, L.N., + , T-C May 03* 617-632
systematic method for modifying march tests for bit-oriented memories into tests for word-oriented memories. *Van de Goor, A.J., + , T-C Oct 03* 1320-1331
Memory protocols
cache coherence in intell. memory systs. *Keen, D., + , T-C Jul 03* 960-966
Mesh generation
coverage in wireless ad hoc sens. networks. *Xiang-Yang Li, + , T-C Jun 03* 753-763
Microcontrollers
high-speed oscillator-based truly random no. source for cryptographic appls. on smart card IC. *Bucci, M., + , T-C Apr 03* 403-409
Microprocessor chips
class-based decompressor design for compressed instruction memory in embedded processors. *Weiss, S., + , T-C Nov 03* 1495-1500
dynamically tunable memory hierarchy. *Balasubramonian, R., + , T-C Oct 03* 1243-1258
Microprocessor chips; cf. Digital signal processing chips; Microcontrollers
Middleware
composable proxy services to support collaboration on mobile Internet. *McKinley, P.K., + , T-C Jun 03* 713-726
Minimization
linearly transformed binary decision diags., efficient minimization/manipulation. *Gunther, W., + , T-C Sep 03* 1196-1209
Mobile agents
fault-tolerant mobile agent execution. *Pleisch, S., + , T-C Feb 03* 209-222
mobile agent-based advanced service archit. for wireless Internet telephony, design, implement., and eval. *Emako, B., + , T-C Jun 03* 690-705
Mobile communication
adaptive approaches to relieving broadcast storms in wireless multihop mobile ad hoc network. *Yu-Chee Tseng, + , T-C May 03* 545-557
caching scheme for routing in mobile ad hoc networks and its application to ZRP. *Beraldi, R., + , T-C Aug 03* 1051-1062
reliable real-time commun. in cooperative mobile appls. *Nett, E., + , T-C Feb 03* 166-180
thinning schemes for call admission control in wireless networks. *Yuguang Fang, T-C May 03* 685-687
wireless Internet (special section). *T-C Jun 03* 689-814
wireless Internet (special section intro.). *Yi-Bing Lin, + , T-C Jun 03* 689
Mobile communication; cf. 3G mobile communication; Mobile radio
Mobile computing
composable proxy services to support collaboration on mobile Internet. *McKinley, P.K., + , T-C Jun 03* 713-726
modeling, analysis, and self-management of electronic textiles. *Stanley-Marbell, P.S., + , T-C Aug 03* 996-1010
nonideal battery properties and their impact on software design for wearable computers. *Martin, T.L., + , T-C Aug 03* 979-984
system modeling and perform. eval. of rate allocation schemes for packet data services in W-CDMA systs. *Yu-Kwong Kwok, + , T-C Jun 03* 804-814
using physical context for just-in-time information retrieval. *Rhodes, B., T-C Aug 03* 1011-1014
Mobile radio
movement-based mobility mgt. and trade off anal. for wireless mobile networks. *Yuguang Fang, T-C Jun 03* 791-803
Modeling
IC bridge fault modeling for IP blocks using neural network-based VHDL saboteurs. *Shaw, D.B., + , T-C Oct 03* 1285-1297
performance and energy consumption of embedded real-time operating systems. *Baynes, K., + , T-C Nov 03* 1454-1469
wearable computers (special section). *T-C Aug 03* 977-1014
wearable computers (special section intro.). *Smailagic, A., T-C Aug 03* 977-978
wireless Internet (special section). *T-C Jun 03* 689-814
wireless Internet (special section intro.). *Yi-Bing Lin, + , T-C Jun 03* 689
Monolithic integrated circuits; cf. Application specific integrated circuits
MOS integrated circuits; cf. CMOS integrated circuits
MOS logic circuits; cf. CMOS logic circuits
Multi-access systems; cf. Code division multiple access
Multi-agent systems
mobile agent-based advanced service archit. for wireless Internet telephony, design, implement., and eval. *Emako, B., + , T-C Jun 03* 690-705
Multicast communication
RACCOOM, rate-based congestion control approach for multicast. *Gao, Y., + , T-C Dec 03* 1521-1534
reliable real-time commun. in cooperative mobile appls. *Nett, E., + , T-C Feb 03* 166-180
Multicast communication; cf. Multicast protocols
Multicast protocols
many-to-many multicast routing with temporal QoS guarantees. *Hung-Ying Tyan, + , T-C Jun 03* 826-832
peer-to-peer membership mgt. for gossip-based protocols. *Ganesh, A.J., + , T-C Feb 03* 139-149
semantically reliable multicast, defn., implement., and perform. eval. *Pereira, J., + , T-C Feb 03* 150-165
Multidimensional systems
efficient data compression methods for multidimensional sparse array operations based on the EKMR scheme. *Lin, C.-Y., + , T-C Dec 03* 1640-1646
Multimedia servers
disk arrays, complexity of retrieval problems, random redundant storage. *Aerts, J., + , T-C Sep 03* 1210-1214
Multimedia systems
bottlenecks in multimedia processing with SIMD style extensions and architectural enhancements. *Talla, D., + , T-C Aug 03* 1015-1031
guaranteed throughput of multizone disks. *Michiels, W., + , T-C Nov 03* 1407-1420

+ Check author entry for coauthors

self-modifiable color Petri nets for modeling user manipulation and network event handling. *Sheng-Uei Guan, + , T-C Jul 03* 920-932
Multimedia systems; cf. Hypermedia
Multiplexing equipment
computing packet loss probabilities in MUX models using rational approx. *Cuyt, A., + , T-C May 03* 633-644
Multiplying circuits
low complexity multiplication in finite field using ring representation. *Katti, R., + , T-C Apr 03* 418-427
redundant representation of GF(q^n) for designing arith. ccts. *Geiselmann, W., + , T-C Jul 03* 848-853
Multiprocessing systems
enhances cluster k-Ary n-Cube, fault-tolerant multiprocessor. *Izadi, B.A., + , T-C Nov 03* 1443-1453
multigrid method, algm.-based error detect. scheme. *Mishra, A., + , T-C Sep 03* 1089-1099
rate-monotonic scheduling on uniform multiprocessors. *Baruah, S.K., + , T-C Jul 03* 966-970
schedulability and perform. anal. of similarity stack protocol. *Tei-Wei Kuo, + , T-C May 03* 658-669
(t, k)-diagnosable syst., a generalization of the PMC models. *Araki, T., + , T-C Jul 03* 971-975
uniform multiprocessors, robustness results concerning EDF sched. *Baruah, S., + , T-C Sep 03* 1185-1195
Multiprocessing systems; cf. Distributed memory systems; Shared memory systems
Multiprocessor interconnection networks
comments on "A fast and efficient proc. allocation scheme for mesh-connected multicomputers". *Lu Zhang, T-C Feb 03* 255-256
counterexample to Tang and Padubidri's claim about bisection width of diagonal mesh. *Jha, P.K., T-C May 03* 676-677
isomorphic strategy for proc. allocation in k-ary n-cube systs. *Moonsoo Kang, + , T-C May 03* 645-657
rectilinear-monotone polygonal fault block model for fault-tolerant min. routing in mesh. *Dajin Wang, T-C Mar 03* 310-320
switch MSHR, tech. to reduce rem. read memory access time in CC-NUMA multiprocessors. *Bhuyan, L.N., + , T-C May 03* 617-632
tolerant and deadlock-free routing protocol, 2D meshes, odd-even turn model. *Jie Wu, T-C Sep 03* 1154-1169
Multiprocessor interconnection networks; cf. Hypercube networks

N

Network operating systems
deno, a decentralized, peer-to-peer obj.-replication syst. for weakly connected environ. *Cetintemel, U., + , T-C Jul 03* 943-959
user-level QoS-adaptive resource mgt. in server end-systs. *Abdelzaher, T.F., + , T-C May 03* 678-685
Network routing
exact routing with search space reduction. *Schmiedle, F., + , T-C Jun 03* 815-825
market-based resource allocation for content delivery in the Internet. *Ercetin, O., + , T-C Dec 03* 1573-1585
rectilinear-monotone polygonal fault block model for fault-tolerant min. routing in mesh. *Dajin Wang, T-C Mar 03* 310-320
Network routing; cf. Telecommunication network routing
Networks (circuits)
reliable real-time communication in CAN networks. *Pinho, L.M., + , T-C Dec 03* 1594-1607
synthesis of easily testable (k, K) circuits. *Naidu, S.R., + , T-C Nov 03* 1490-1494
Networks (circuits); cf. Distribution networks; Integrated circuits; Multiplying circuits; Oscillators
Network servers; cf. File servers; Multimedia servers; Video servers
Network synthesis; cf. Circuit CAD; Integrated circuit design
Numerical analysis; cf. Error analysis; Finite difference methods; Finite element analysis; Interpolation; Iterative methods; Relaxation theory

O

Object-oriented languages; cf. Java
Operating system kernels
user-level QoS-adaptive resource mgt. in server end-systs. *Abdelzaher, T.F., + , T-C May 03* 678-685
Operating systems (computers); cf. Input-output programs; Network operating systems; Operating system kernels; Unix
Operations research; cf. Scheduling
Optimization
discharge current steering for battery lifetime optimization. *Benini, L., + , T-C Aug 03* 985-995
evaluating integrated hardware-software optim. using, unified energy estim. framework. *Vijaykrishnan, N., + , T-C Jan 03* 59-76
improved rate-monotonic admission control and appls. *Lauzac, S., + , T-C Mar 03* 337-350
new scheme for link and signaling costs reduction in mobile IP. *Lee, Y.J., + , T-C Jun 03* 706-712
test access mechanism optimization, test scheduling, and tester data volume reduction for system-on-chip. *Iyengar, V., + , T-C Dec 03* 1619-1632
Optimization; cf. Minimization
Optimizing compilers
minimum register instruction sequencing to reduce register spills in out-of-order issue superscalar archits. *Govindarajan, R., + , T-C Jan 03* 4-20
variable instruction set archit. and compiler support. *Liu, J., + , T-C Jul 03* 881-895
Oscillators
high-speed oscillator-based truly random no. source for cryptographic appls. on smart card IC. *Bucci, M., + , T-C Apr 03* 403-409

P

Packet radio networks
composable proxy services to support collaboration on mobile Internet. *McKinley, P.K., + , T-C Jun 03* 713-726
movement-based mobility mgt. and trade off anal. for wireless mobile networks. *Yuguang Fang, T-C Jun 03* 791-803
new scheme for link and signaling costs reduction in mobile IP. *Lee, Y.J., + , T-C Jun 03* 706-712
performance of IP-based services over GPRS. *Chitre, V.A., + , T-C Jun 03* 727-741
performance optim. of VoIP calls over wireless links using H.323 protocol. *Das, S.K., + , T-C Jun 03* 742-752
system modeling and perform. eval. of rate allocation schemes for packet data services in W-CDMA systs. *Yu-Kwong Kwok, + , T-C Jun 03* 804-814
Packet radio networks; cf. Ad hoc networks
Packet switching
boost perform. of nets., source routing, applying in-transit buffers. *Flich, J., + , T-C Sep 03* 1134-1153
computing packet loss probabilities in MUX models using rational approx. *Cuyt, A., + , T-C May 03* 633-644
performance impact of coarse timer granularities on QoS guarantees in Unix-Based systs. *Jin-Ho Kim, + , T-C Jan 03* 51-58
Parallel algorithms
modular multiplication, Montgomery's algm., scalable archit. *Tenca, A.F., + , T-C Sep 03* 1215-1221
new systolic architectures for inversion and division in GF(2^m). *Yan, Z., + , T-C Nov 03* 1514-1519
tests and tolerances for high-perform. software-implemehted fault detect. *Turmon, M., + , T-C May 03* 579-591
Parallel architectures
bottlenecks in multimedia processing with SIMD style extensions and architectural enhancements. *Talla, D., + , T-C Aug 03* 1015-1031
isomorphic strategy for proc. allocation in k-ary n-cube systs. *Moonsoo Kang, + , T-C May 03* 645-657
latency, occupancy, and bandwidth in DSM multiprocessors, a perform. eval. *Chaudhuri, M., + , T-C Jul 03* 862-880
parallel CRC realization. *Campobello, G., + , T-C Oct 03* 1312-1319
redundant disk arrays, asynchronous sched. *Sanders, P., T-C Sep 03* 1170-1184
Parallel architectures; cf. Systolic arrays
Parallel processing
multigrid method, algm.-based error detect. scheme. *Mishra, A., + , T-C Sep 03* 1089-1099
Parallel processing; cf. Data flow computing; Parallel algorithms; Parallel architectures; Parallel programming
Parallel programming
balancing reuse opportunities and performance gains with subblock value reuse. *Jian Huang, + , T-C Aug 03* 1032-1050
bottlenecks in multimedia processing with SIMD style extensions and architectural enhancements. *Talla, D., + , T-C Aug 03* 1015-1031
modeling value speculation, optimal edge selection problem. *Chao-ying Fu, + , T-C Mar 03* 277-292
Partial differential equations; cf. Poisson equation
Pattern formation
multiple-seed TPG structures. *Kagaris, D., T-C Dec 03* 1633-1639
Pattern recognition
concurrent application of compaction and compression of test time and data volume reduction in scan designs. *Bayraktaroglu, I., + , T-C Nov 03* 1480-1489
perfect fault coverage. *Chatterjee, M., + , T-C Dec 03* 1543-1558
Performance evaluation
balancing reuse opportunities and performance gains with subblock value reuse. *Jian Huang, + , T-C Aug 03* 1032-1050
boost perform. of nets., source routing, applying in-transit buffers. *Flich, J., + , T-C Sep 03* 1134-1153
bottlenecks in multimedia processing with SIMD style extensions and architectural enhancements. *Talla, D., + , T-C Aug 03* 1015-1031
cache coherence in intell. memory systs. *Keen, D., + , T-C Jul 03* 960-966
caching scheme for routing in mobile ad hoc networks and its application to ZRP. *Beraldi, R., + , T-C Aug 03* 1051-1062
dynamically tunable memory hierarchy. *Balasubramonian, R., + , T-C Oct 03* 1243-1258
fault-tolerant mobile agent execution. *Pleisch, S., + , T-C Feb 03* 209-222
latency, occupancy, and bandwidth in DSM multiprocessors, a perform. eval. *Chaudhuri, M., + , T-C Jul 03* 862-880
modeling, analysis, and self-management of electronic textiles. *Stanley-Marbell, P.S., + , T-C Aug 03* 996-1010
movement-based mobility mgt. and trade off anal. for wireless mobile networks. *Yuguang Fang, T-C Jun 03* 791-803
nonideal battery properties and their impact on software design for wearable computers. *Martin, T.L., + , T-C Aug 03* 979-984
novel reordering write buffer to improve write performance of log-structured file systems. *Wang, J., + , T-C Dec 03* 1559-1572
perfect failure detect. in timed asynchronous systs. *Fetzer, C., T-C Feb 03* 99-112
performability eval. of multipurpose multiprocessor systs., "separation of concerns" approach. *Rabah, M., + , T-C Feb 03* 223-236
performance and energy consumption of embedded real-time operating systems. *Baynes, K., + , T-C Nov 03* 1454-1469
performance enhancements of ad hoc networks with localized route fix. *Duggirala, R., + , T-C Jul 03* 854-861
performance impact of coarse timer granularities on QoS guarantees in Unix-Based systs. *Jin-Ho Kim, + , T-C Jan 03* 51-58
probabilistic miss eqns., memory hierarchy perform. evaluation. *Fraguela, B.B., + , T-C Mar 03* 321-336
RACCOOM, rate-based congestion control approach for multicast. *Gao, Y., + , T-C Dec 03* 1521-1534
rate monotonic anal., hyperb. bound. *Bini, E., + , T-C Jul 03* 933-942
schedulability and perform. anal. of similarity stack protocol. *Tei-Wei Kuo, + , T-C May 03* 658-669
switch MSHR, tech. to reduce rem. read memory access time in CC-NUMA multiprocessors. *Bhuyan, L.N., + , T-C May 03* 617-632
system modeling and perform. eval. of rate allocation schemes for packet data services in W-CDMA systs. *Yu-Kwong Kwok, + , T-C Jun 03* 804-814
thinning schemes for call admission control in wireless networks. *Yuguang Fang, T-C May 03* 685-687
uniform multiprocessors, robustness results concerning EDF sched. *Baruah, S., + , T-C Sep 03* 1185-1195
Performance evaluation; cf. Software performance evaluation
Personal computing
using physical context for just-in-time information retrieval. *Rhodes, B., T-C Aug 03* 1011-1014
Petri nets
self-modifiable color Petri nets for modeling user manipulation and network event handling. *Sheng-Uei Guan, + , T-C Jul 03* 920-932
Picocellular radio
nULLVALUE. *Petrioli, C., + , T-C Jun 03* 779-790
Pipeline processing
effective pixel rasterization pipeline architecture for 3D rendering processorspixel rasterization pipeline architecture for 3D rendering processors. *Park, W.-C., + , T-C Nov 03* 1501-1508
efficient implement. of cryptographically useful "large" Boolean fns. *Sarkar, P., + , T-C Apr 03* 410-417

Plastic cards; cf. Smart cards
Poisson equation
multigrid method, algm.-based error detect. scheme. *Mishra, A., + , T-C Sep 03* 1089-1099
Polynomials
achieving NTRU with Montgomery multiplication. *O'Rourke, C., + , T-C Apr 03* 440-448
constructing composite field representations for efficient conversion. *Sunar, B., + , T-C Nov 03* 1391-1398
low complexity multiplication in finite field using ring representation. *Katti, R., + , T-C Apr 03* 418-427
parallel multipliers based on special irreducible pentanomials. *Rodriguez-Henriquez, F., + , T-C Dec 03* 1535-1542
synthesis of easily testable (k, K) circuits. *Naidu, S.R., + , T-C Nov 03* 1490-1494
Portable computers; cf. Wearable computers
Power consumption
performance and energy consumption of embedded real-time operating systems. *Baynes, K., + , T-C Nov 03* 1454-1469
Power distribution; cf. Distribution networks
Power supplies to apparatus; cf. Computer power supplies
Prediction theory
predicting defect-tolerant yield in embedded core context. *Meyer, J., + , T-C Nov 03* 1470-1479
Probability
computing packet loss probabilities in MUX models using rational approx. *Cuyt, A., + , T-C May 03* 633-644
movement-based mobility mgt. and trade off anal. for wireless mobile networks. *Yuguang Fang, T-C Jun 03* 791-803
peer-to-peer membership mgt. for gossip-based protocols. *Ganesh, A.J., + , T-C Feb 03* 139-149
Processor scheduling
comments on "A fast and efficient proc. allocation scheme for mesh-connected multicomputers". *Lu Zhang, T-C Feb 03* 255-256
disproving perfect-rate property of data-flow graphs unfolded by least common multiple of no. of loop register. *Wolz, F., + , T-C May 03* 688
improved rate-monotonic admission control and appls. *Lauzac, S., + , T-C Mar 03* 337-350
isomorphic strategy for proc. allocation in k-ary n-cube systs. *Moonsoo Kang, + , T-C May 03* 645-657
maintaining temporal consistency of discrete objs. in soft real-time database systs. *Ben Kao, + , T-C Mar 03* 373-389
modeling value speculation, optimal edge selection problem. *Chao-ying Fu, + , T-C Mar 03* 277-292
quantification of aborting effect for real-time data accesses. *Ming-Chung Liang, + , T-C May 03* 670-675
rate-monotonic scheduling on uniform multiprocessors. *Baruah, S.K., + , T-C Jul 03* 966-970
schedulability and perform. anal. of similarity stack protocol. *Tei-Wei Kuo, + , T-C May 03* 658-669
uniform multiprocessors, robustness results concerning EDF sched. *Baruah, S., + , T-C Sep 03* 1185-1195
utilization bound revisited. *Deji Chen, + , T-C Mar 03* 351-361
Program compilers
balancing reuse opportunities and performance gains with subblock value reuse. *Jian Huang, + , T-C Aug 03* 1032-1050
modeling value speculation, optimal edge selection problem. *Chao-ying Fu, + , T-C Mar 03* 277-292
Program compilers; cf. Optimizing compilers
Program control structures
bottlenecks in multimedia processing with SIMD style extensions and architectural enhancements. *Talla, D., + , T-C Aug 03* 1015-1031
Program diagnostics; cf. Data flow analysis; Program slicing
Programmable circuits; cf. Programmable logic arrays
Programmable logic arrays
class-based decompressor design for compressed instruction memory in embedded processors. *Weiss, S., + , T-C Nov 03* 1495-1500
tight upper bounds on the minimum precision required of divisor and partial remainder in high-radix division. *Parhami, B., T-C Nov 03* 1509-1514
Programmable logic arrays; cf. Field programmable gate arrays
Programmable logic devices
analysis and FPGA implement. of image restoration under resource constraints. *Memik, S.O., + , T-C Mar 03* 390-399
Programmable logic devices; cf. Programmable logic arrays
Programming; cf. Program control structures; Program testing
Program processors; cf. Program compilers
Program slicing
balancing reuse opportunities and performance gains with subblock value reuse. *Jian Huang, + , T-C Aug 03* 1032-1050
Program testing
phys. and software-implemented fault injection techs., comp. *Arlat, J., + , T-C Sep 03* 1115-1133
Project engineering; cf. Scheduling
Protocols
deno, a decentralized, peer-to-peer obj.-replication syst. for weakly connected environ. *Cetintemel, U., + , T-C Jul 03* 943-959
process recovery in heterog. systs. *Kuo-Feng Ssu, + , T-C Feb 03* 126-138
rate monotonic anal., hyperb. bound. *Bini, E., + , T-C Jul 03* 933-942
reflective fault-tolerant systs., experience to challenges. *Ruiz, J.C., + , T-C Feb 03* 237-254
reliable distributed systems (special issue). *T-C Feb 03* 97-256
reliable distributed systems (special issue intro.). *Upadhyaya, S.J., + , T-C Feb 03* 97-98
reliable real-time communication in CAN networks. *Pinho, L.M., + , T-C Dec 03* 1594-1607
rSA speedup with Chinese remainder theorem immune against hardware fault cryptanalysis. *Sung-Ming Yen, + , T-C Apr 03* 461-472
self-mocifiable color Petri nets for modeling user manipulation and network event handling. *Sheng-Uei Guan, + , T-C Jul 03* 920-932
two-version based concurrency control and recovery in real-time client/server databases. *Tei-Wei Kuo, + , T-C Apr 03* 506-524
Protocols; cf. Access protocols; Memory protocols; Multicast protocols; Routing protocols; Transport protocols
Public key cryptography
achieving NTRU with Montgomery multiplication. *O'Rourke, C., + , T-C Apr 03* 440-448
cryptographic hardware and embedded systems (special section). *T-C Apr 03* 401-505
cryptographic hardware and embedded systems (special section intro.). *Koc, C.K., + , T-C Apr 03* 401-402
low complexity multiplication in finite field using ring representation. *Katti, R., + , T-C Apr 03* 418-427
rSA speedup with Chinese remainder theorem immune against hardware fault cryptanalysis. *Sung-Ming Yen, + , T-C Apr 03* 461-472
scalable dual-field ellipt. curve cryptographic proc. *Satoh, A., + , T-C Apr 03* 449-460
Publishing
list of reviewers, 2002. *T-C Jan 03* 93-96

Q

Quality of service
aQuA, adaptive archit. that provides dependable distributed objs. *Yansong Ren, + , T-C Jan 03* 31-50
efficient multipolling mechanism for IEEE 802.11 WLAN. *Shou-Chih Lo, + , T-C Jun 03* 764-778
many-to-many multicast routing with temporal QoS guarantees. *Hung-Ying Tyan, + , T-C Jun 03* 826-832
new scheme for link and signaling costs reduction in mobile IP. *Lee, Y.J., + , T-C Jun 03* 706-712
performance impact of coarse timer granularities on QoS guarantees in Unix-Based systs. *Jin-Ho Kim, + , T-C Jan 03* 51-58
performance optim. of VoIP calls over wireless links using H.323 protocol. *Das, S.K., + , T-C Jun 03* 742-752
user-level QoS-adaptive resource mgt. in server end-systs. *Abdelzaher, T.F., + , T-C May 03* 678-685
Query processing
quantification of aborting effect for real-time data accesses. *Ming-Chung Liang, + , T-C May 03* 670-675
schedulability and perform. anal. of similarity stack protocol. *Tei-Wei Kuo, + , T-C May 03* 658-669
Queuing theory
computing packet loss probabilities in MUX models using rational approx. *Cuyt, A., + , T-C May 03* 633-644
redundant disk arrays, asynchronous sched. *Sanders, P., T-C Sep 03* 1170-1184

R

Radio access networks
adaptive approaches to relieving broadcast storms in wireless multihop mobile ad hoc network. *Yu-Chee Tseng, + , T-C May 03* 545-557
Radiocommunication; cf. Bluetooth; Mobile radio
Radio networks; cf. Packet radio networks; Radio access networks
Radiotelephony; cf. Cellular radio
RAID
disk arrays, complexity of retrieval problems, random redundant storage. *Aerts, J., + , T-C Sep 03* 1210-1214
redundant disk arrays, asynchronous sched. *Sanders, P., T-C Sep 03* 1170-1184
Random-access storage; cf. DRAM chips
Random number generation
high-speed oscillator-based truly random no. source for cryptographic appls. on smart card IC. *Bucci, M., + , T-C Apr 03* 403-409
Random processes; cf. Queuing theory
Real-time systems
fault-tolerant scheduling algm. for real-time periodic tasks with possible software faults. *Ching-Chih Han, + , T-C Mar 03* 362-372
improved rate-monotonic admission control and appls. *Lauzac, S., + , T-C Mar 03* 337-350
incremental server for scheduling overloaded real-time systems. *Mejia-Alvarez, P., + , T-C Oct 03* 1347-1361
maintaining temporal consistency of discrete objs. in soft real-time database systs. *Ben Kao, + , T-C Mar 03* 373-389
optimal fixed-priority assignment algorithm for supporting fault-tolerant hard real-time systems. *De A. Lima, G.M., + , T-C Oct 03* 1332-1346
performance and energy consumption of embedded real-time operating systems. *Baynes, K., + , T-C Nov 03* 1454-1469
phys. and software-implemented fault injection techs., comp. *Arlat, J., + , T-C Sep 03* 1115-1133
quantification of aborting effect for real-time data accesses. *Ming-Chung Liang, + , T-C May 03* 670-675
rate monotonic anal., hyperb. bound. *Bini, E., + , T-C Jul 03* 933-942
rate-monotonic scheduling on uniform multiprocessors. *Baruah, S.K., + , T-C Jul 03* 966-970
redundant disk arrays, asynchronous sched. *Sanders, P., T-C Sep 03* 1170-1184
reliable real-time communication in CAN networks. *Pinho, L.M., + , T-C Dec 03* 1594-1607
reliable real-time commun. in cooperative mobile appls. *Nett, E., + , T-C Feb 03* 166-180
schedulability and perform. anal. of similarity stack protocol. *Tei-Wei Kuo, + , T-C May 03* 658-669
two-version based concurrency control and recovery in real-time client/server databases. *Tei-Wei Kuo, + , T-C Apr 03* 506-524
uniform multiprocessors, robustness results concerning EDF sched. *Baruah, S., + , T-C Sep 03* 1185-1195
utilization bound revisited. *Deji Chen, + , T-C Mar 03* 351-361
voltage-clock-scaling adaptive scheduling techniques for low power in hard real-time systems. *Krishna, C.M., + , T-C Dec 03* 1594-1607
Real-time systems; cf. Embedded systems
Reconfigurable architectures
combining temporal partitioning and sharing of functional units in compilation for reconfigurable architectures. *Cardoso, J.M.P., T-C Oct 03* 1362-1375
dynamically tunable memory hierarchy. *Balasubramonian, R., + , T-C Oct 03* 1243-1258
efficient implement. of cryptographically useful "large" Boolean fns. *Sarkar, P., + , T-C Apr 03* 410-417
variable instruction set archit. and compiler support. *Liu, J., + , T-C Jul 03* 881-895
Redundancy
building survivable services using redundancy and adaptation. *Hiltunen, M.A., + , T-C Feb 03* 181-194
fault-tolerant scheduling algm. for real-time periodic tasks with possible software faults. *Ching-Chih Han, + , T-C Mar 03* 362-372
modeling, analysis, and self-management of electronic textiles. *Stanley-Marbell, P.S., + , T-C Aug 03* 996-1010
Redundant number systems
redundant representation of GF(q^n) for designing arith. ccts. *Geiselmann, W., + , T-C Jul 03* 848-853

+ Check author entry for coauthors

Reed-Muller codes
comment on "Generalized Reed-Muller forms as, tool to detect symms. *Faikowski, B.J., T-C Jul 03* 975-976
Relaxation theory
multigrid method, algm.-based error detect. scheme. *Mishra, A., + , T-C Sep 03* 1089-1099
Reliability
BDD-based algorithm for analysis of multistate systems with multistate components. *Zang, X., + , T-C Dec 03* 1608-1618
reliable distributed systems (special issue). *T-C Feb 03* 97-256
reliable distributed systems (special issue intro.). *Upadhyaya, S.J., + , T-C Feb 03* 97-98
reliable real-time communication in CAN networks. *Pinho, L.M., + , T-C Dec 03* 1594-1607
Reliability; cf. Circuit reliability; Fault tolerance; Fault tolerant computing; Software reliability
Rendering (computer graphics)
effective pixel rasterization pipeline architecture for 3D rendering processors. *Park, W.-C., + , T-C Nov 03* 1501-1508
Replicated databases
deno, a decentralized, peer-to-peer obj.-replication syst. for weakly connected environ. *Cetintemel, U., + , T-C Jul 03* 943-959
Residue number systems
deterministic BIST for RNS adders. *Vergos, H.T., + , T-C Jul 03* 896-906
new CRT-based RNS converter using restricted moduli set. *Conway, R., + , T-C May 03* 572-578
redundant representation of GF(q^n) for designing arith. cct. *Geiselmann, W., + , T-C Jul 03* 848-853
rSA speedup with Chinese remainder theorem immune against hardware fault cryptanalysis. *Sung-Ming Yen, + , T-C Apr 03* 461-472
Resource allocation
analysis and FPGA implement. of image restoration under resource constraints. *Memik, S.O., + , T-C Mar 03* 390-399
isomorphic strategy for proc. allocation in k-ary n-cube systs. *Moonsoo Kang, + , T-C May 03* 645-657
market-based resource allocation for content delivery in the Internet. *Ercetin, O., + , T-C Dec 03* 1573-1585
redundant disk arrays, asynchronous sched. *Sanders, P., T-C Sep 03* 1170-1184
reliable real-time commun. in cooperative mobile appls. *Nett, E., + , T-C Feb 03* 166-180
uniform multiprocessors, robustness results concerning EDF sched. *Baruah, S., + , T-C Sep 03* 1185-1195
Roundoff errors
multigrid method, algm.-based error detect. scheme. *Mishra, A., + , T-C Sep 03* 1089-1099
radix-4 reciprocal sq.-root and combination, division and sq. root. *Lang, T., + , T-C Sep 03* 1100-1114
tests and tolerances for high-perform. software-implemehted fault detect. *Turmon, M., + , T-C May 03* 579-591
Routing protocols
caching scheme for routing in mobile ad hoc networks and its application to ZRP. *Beraldi, R., + , T-C Aug 03* 1051-1062
extended fault-tolerant link-state routing protocol in the Internet. *Wu, J., + , T-C Oct 03* 1298-1311
many-to-many multicast routing with temporal QoS guarantees. *Hung-Ying Tyan, + , T-C Jun 03* 826-832
new scheme for link and signaling costs reduction in mobile IP. *Lee, Y.J., + , T-C Jun 03* 706-712
performance enhancements of ad hoc networks with localized route fix. *Duggirala, R., + , T-C Jul 03* 854-861
tolerant and deadlock-free routing protocol, 2D meshes, odd-even turn model. *Jie Wu, T-C Sep 03* 1154-1169
Runlength codes
test data compression and test resource partitioning for system-on-a-chip using frequency-directed run-length (FDR) codes. *Chandra, A., + , T-C Aug 03* 1076-1088

S

Scheduling
combining temporal partitioning and sharing of functional units in compilation for reconfigurable architectures. *Cardoso, J.M.P., T-C Oct 03* 1362-1375
discharge current steering for battery lifetime optimization. *Benini, L., + , T-C Aug 03* 985-995
incremental server for scheduling overloaded real-time systems. *Mejia-Alvarez, P., + , T-C Oct 03* 1347-1361
rate monotonic anal., hyperb. bound. *Bini, E., + , T-C Jul 03* 933-942
redundant disk arrays, asynchronous sched. *Sanders, P., T-C Sep 03* 1170-1184
test access mechanism optimization, test scheduling, and tester data volume reduction for system-on-chip. *Iyengar, V., + , T-C Dec 03* 1619-1632
variable instruction set archit. and compiler support. *Lin, J., + , T-C Jul 03* 881-895
voltage-clock-scaling adaptive scheduling techniques for low power in hard real-time systems. *Krishna, C.M., + , T-C Dec 03* 1594-1607
Scheduling; cf. Processor scheduling
Search problems
exact routing with search space reduction. *Schmiedle, F., + , T-C Jun 03* 815-825
Security
fast normal basis multiplication using general purpose processors. *Reyhani-Masoleh, A., + , T-C Nov 03* 1379-1390
Security; cf. Security of data
Security of data
deno, a decentralized, peer-to-peer obj.-replication syst. for weakly connected environ. *Cetintemel, U., + , T-C Jul 03* 943-959
Security of data; cf. Cryptography
Sequential circuits
nonscan design for testability for synchronous sequential circuits based on conflict resolution. *Dong Xiang, + , T-C Aug 03* 1063-1075
Sequential estimation
concurrent application of compaction and compression of test time and data volume reduction in scan designs. *Bayraktaroglu, I., + , T-C Nov 03* 1480-1489
Shared memory systems
cache coherence in intell. memory systs. *Keen, D., + , T-C Jul 03* 960-966
performability eval. of multipurpose multiprocessor systs., "separation of concerns" approach. *Rabah, M., + , T-C Feb 03* 223-236
Shared memory systems; cf. Distributed shared memory systems
Shift registers
multiple-seed TPG structures. *Kagaris, D., T-C Dec 03* 1633-1639
perfect fault coverage. *Chatterjee, M., + , T-C Dec 03* 1543-1558
Signal processing; cf. Data compression; Digital signal processing chips
Signal restoration; cf. Image restoration
Simulation
IC bridge fault modeling for IP blocks using neural network-based VHDL saboteurs. *Shaw, D.B., + , T-C Oct 03* 1285-1297
Smart cards
high-speed oscillator-based truly random no. source for cryptographic appls. on smart card IC. *Bucci, M., + , T-C Apr 03* 403-409
Software agents
using physical context for just-in-time information retrieval. *Rhodes, B., T-C Aug 03* 1011-1014
Software agents; cf. Mobile agents
Software engineering
nonideal battery properties and their impact on software design for wearable computers. *Martin, T.L., + , T-C Aug 03* 979-984
Software engineering; cf. Formal verification; Software performance evaluation; Software portability; Software reliability; Software reusability
Software fault tolerance
aQuA, adaptive archit. that provides dependable distributed objs. *Yansong Ren, + , T-C Jan 03* 31-50
tests and tolerances for high-perform. software-implemehted fault detect. *Turmon, M., + , T-C May 03* 579-591
Software performance evaluation
minimum register instruction sequencing to reduce register spills in out-of-order issue superscalar archits. *Govindarajan, R., + , T-C Jan 03* 4-20
semantically reliable multicast, defn., implement., and perform. eval. *Pereira, J., + , T-C Feb 03* 150-165
Software portability
user-level QoS-adaptive resource mgt. in server end-systs. *Abdelzaher, T.F., + , T-C May 03* 678-685
Software reliability
semantically reliable multicast, defn., implement., and perform. eval. *Pereira, J., + , T-C Feb 03* 150-165
Software reliability; cf. Software fault tolerance
Software reusability
balancing reuse opportunities and performance gains with subblock value reuse. *Jian Huang, + , T-C Aug 03* 1032-1050
Sparse matrices
efficient data compression methods for multidimensional sparse array operations based on the EKMR scheme. *Lin, C.-Y., + , T-C Dec 03* 1640-1646
Spatial variables control; cf. Volume control
Spatial variables measurement; cf. Volume measurement
Special issues and sections
cryptographic hardware and embedded systems (special section). *T-C Apr 03* 401-505
cryptographic hardware and embedded systems (special section intro.). *Koc, C.K., + , T-C Apr 03* 401-402
reliable distributed systems (special issue). *T-C Feb 03* 97-256
reliable distributed systems (special issue intro.). *Upadhyaya, S.J., + , T-C Feb 03* 97-98
wearable computers (special section). *T-C Aug 03* 977-1014
wearable computers (special section intro.). *Smailagic, A., T-C Aug 03* 977-978
wireless Internet (special section). *T-C Jun 03* 689-814
wireless Internet (special section intro.). *Yi-Bing Lin, + , T-C Jun 03* 689
Specification languages; cf. Hardware description languages
Standards
cryptographic hardware and embedded systems (special section). *T-C Apr 03* 401-505
cryptographic hardware and embedded systems (special section intro.). *Koc, C.K., + , T-C Apr 03* 401-402
Standards; cf. IEEE standards; Telecommunication standards
Statistics; cf. Decision theory; Game theory
Stochastic processes
performability eval. of multipurpose multiprocessor systs., "separation of concerns" approach. *Rabah, M., + , T-C Feb 03* 223-236
Storage management
decoupled predictor-directed stream prefetching archit. *Sair, S., + , T-C Mar 03* 260-276
efficient data compression methods for multidimensional sparse array operations based on the EKMR scheme. *Lin, C.-Y., + , T-C Dec 03* 1640-1646
modeling/dimensioning hierarchical storage systs. for low-delay video services. *Chan, S.-H.G., + , T-C Jul 03* 907-919
novel reordering write buffer to improve write performance of log-structured file systems. *Wang, J., + , T-C Dec 03* 1559-1572
systematic method for modifying march tests for bit-oriented memories into tests for word-oriented memories. *Van de Goor, A.J., + , T-C Oct 03* 1320-1331
Storage management; cf. Buffer storage; Memory protocols
Storage media; cf. Hard disks
Subroutines
adaptive algorithms for maximal diagnosis of wiring interconnects. *Feng, W.-Y., + , T-C Oct 03* 1259-1270
BDD-based algorithm for analysis of multistate systems with multistate components. *Zang, X., + , T-C Dec 03* 1608-1618
fast normal basis multiplication using general purpose processors. *Reyhani-Masoleh, A., + , T-C Nov 03* 1379-1390
generalized earliest-first fast addition algorithm. *Yeh, W.-C., + , T-C Oct 03* 1233-1242
new systolic architectures for inversion and division in GF(2^m). *Yan, Z., + , T-C Nov 03* 1514-1519
optimal fixed-priority assignment algorithm for supporting fault-tolerant hard real-time systems. *De A. Lima, G.M., + , T-C Oct 03* 1332-1346
Subscriber loops; cf. Radio access networks
Supervisory programs; cf. Batch processing (computers)
Switching networks; cf. Multiprocessor interconnection networks
Synchronization
analysis of stat. cipher feedback mode of block ciphers. *Heys, H.M., T-C Jan 03* 77-92
deno, a decentralized, peer-to-peer obj.-replication syst. for weakly connected environ. *Cetintemel, U., + , T-C Jul 03* 943-959
reliable real-time commun. in cooperative mobile appls. *Nett, E., + , T-C Feb 03* 166-180
self-modifiable color Petri nets for modeling user manipulation and network event handling. *Sheng-Uei Guan, + , T-C Jul 03* 920-932
System buses
what designers of bus and network archits. should, about hypercubes. *LaForge, L.E., + , T-C Apr 03* 525-544
System-on-chip
test access mechanism optimization, test scheduling, and tester data volume reduction for system-on-chip. *Iyengar, V., + , T-C Dec 03* 1619-1632

test data compression and test resource partitioning for system-on-a-chip using frequency-directed run-length (FDR) codes. *Chandra, A., + , T-C Aug 03* 1076-1088
zero-aliasing space compaction of test responses using single periodic output. *Bhattacharya, B.B., + , T-C Dec 03* 1646-1651

System recovery
multigrid method, algm.-based error detect. scheme. *Mishra, A., + , T-C Sep 03* 1089-1099
process recovery in heterog. systs. *Kuo-Feng Ssu, + , T-C Feb 03* 126-138
tolerant and deadlock-free routing protocol, 2D meshes, odd-even turn model. *Jie Wu, T-C Sep 03* 1154-1169
transparent recovery from intermittent faults in time-triggered distributed systs. *Kandasamy, N., + , T-C Feb 03* 113-125
two-version based concurrency control and recovery in real-time client/server databases. *Tei-Wei Kuo, + , T-C Apr 03* 506-524

Systolic arrays
low complexity multiplication in finite field using ring representation. *Katti, R., + , T-C Apr 03* 418-427
new systolic architectures for inversion and division in GF(2^m). *Yan, Z., + , T-C Nov 03* 1514-1519

T

Telecommunication; cf. Data communication; Mobile communication; Multicast communication; Telecommunication links; Telecommunication standards; Telecommunication traffic

Telecommunication channels; cf. Channel allocation

Telecommunication congestion control
boost perform. of nets., source routing, applying in-transit buffers. *Flich, J., + , T-C Sep 03* 1134-1153
RACCOOM, rate-based congestion control approach for multicast. *Gao, Y., + , T-C Dec 03* 1521-1534
thinning schemes for call admission control in wireless networks. *Yuguang Fang, T-C May 03* 685-687

Telecommunication control; cf. Telecommunication congestion control

Telecommunication equipment; cf. Multiplexing equipment

Telecommunication links
extended fault-tolerant link-state routing protocol in the Internet. *Wu, J., + , T-C Oct 03* 1298-1311

Telecommunication network reliability; cf. Computer network reliability

Telecommunication network routing
boost perform. of nets., source routing, applying in-transit buffers. *Flich, J., + , T-C Sep 03* 1134-1153

Telecommunication network routing; cf. Routing protocols

Telecommunication networks; cf. Broadband networks; Computer networks; Telecommunication network routing

Telecommunication services; cf. Quality of service

Telecommunication standards
reliable real-time commun. in cooperative mobile appls. *Nett, E., + , T-C Feb 03* 166-180

Telecommunication standards; cf. Bluetooth

Telecommunication traffic
boost perform. of nets., source routing, applying in-transit buffers. *Flich, J., + , T-C Sep 03* 1134-1153
performance of IP-based services over GPRS. *Chitre, V.A., + , T-C Jun 03* 727-741
thinning schemes for call admission control in wireless networks. *Yuguang Fang, T-C May 03* 685-687
user-level QoS-adaptive resource mgt. in server end-systs. *Abdelzaher, T.F., + , T-C May 03* 678-685

Telephony; cf. Internet telephony

Temporal databases
maintaining temporal consistency of discrete objs. in soft real-time database systs. *Ben Kao, + , T-C Mar 03* 373-389

Testing
concurrent application of compaction and compression of test time and data volume reduction in scan designs. *Bayraktaroglu, I., + , T-C Nov 03* 1480-1489
perfect fault coverage. *Chatterjee, M., + , T-C Dec 03* 1543-1558
synthesis of easily testable (k, K) circuits. *Naidu, S.R., + , T-C Nov 03* 1490-1494
test access mechanism optimization, test scheduling, and tester data volume reduction for system-on-chip. *Iyengar, V., + , T-C Dec 03* 1619-1632
zero-aliasing space compaction of test responses using single periodic output. *Bhattacharya, B.B., + , T-C Dec 03* 1646-1651

Testing; cf. Built-in self test; Logic testing; Program testing

Thermodynamic properties; cf. Entropy

Three-dimensional displays
effective pixel rasterization pipeline architecture for 3D rendering processors. *Park, W.-C., + , T-C Nov 03* 1501-1508

Time division multiplexing; cf. Packet switching

Timing
maintaining temporal consistency of discrete objs. in soft real-time database systs. *Ben Kao, + , T-C Mar 03* 373-389

Traffic; cf. Telecommunication traffic

Transaction processing
maintaining temporal consistency of discrete objs. in soft real-time database systs. *Ben Kao, + , T-C Mar 03* 373-389
performance of IP-based services over GPRS. *Chitre, V.A., + , T-C Jun 03* 727-741
quantification of aborting effect for real-time data accesses. *Ming-Chung Liang, + , T-C May 03* 670-675
schedulability and perform. anal. of similarity stack protocol. *Tei-Wei Kuo, + , T-C May 03* 658-669

Transport protocols
performance impact of coarse timer granularities on QoS guarantees in Unix-Based systs. *Jin-Ho Kim, + , T-C Jan 03* 51-58
performance of IP-based services over GPRS. *Chitre, V.A., + , T-C Jun 03* 727-741
performance optim. of VoIP calls over wireless links using H.323 protocol. *Das, S.K., + , T-C Jun 03* 742-752
RACCOOM, rate-based congestion control approach for multicast. *Gao, Y., + , T-C Dec 03* 1521-1534

Trees (mathematics); cf. Decision trees

U

Ubiquitous computing; cf. Mobile computing

Unix
deno, a decentralized, peer-to-peer obj.-replication syst. for weakly connected environ. *Cetintemel, U., + , T-C Jul 03* 943-959
performance impact of coarse timer granularities on QoS guarantees in Unix-Based systs. *Jin-Ho Kim, + , T-C Jan 03* 51-58

User interfaces; cf. User modeling

User modeling
self-modifiable color Petri nets for modeling user manipulation and network event handling. *Sheng-Uei Guan, + , T-C Jul 03* 920-932

V

Video equipment; cf. Video servers

Video on demand
modeling/dimensioning hierarchical storage systs. for low-delay video services. *Chan, S.-H.G., + , T-C Jul 03* 907-919

Video servers
modeling/dimensioning hierarchical storage systs. for low-delay video services. *Chan, S.-H.G., + , T-C Jul 03* 907-919

Virtual machines
isomorphic strategy for proc. allocation in k-ary n-cube systs. *Moonsoo Kang, + , T-C May 03* 645-657
latency, occupancy, and bandwidth in DSM multiprocessors, a perform. eval. *Chaudhuri, M., + , T-C Jul 03* 862-880
mobile agent-based advanced service archit. for wireless Internet telephony, design, implement., and eval. *Emako, B., + , T-C Jun 03* 690-705
schedulability and perform. anal. of similarity stack protocol. *Tei-Wei Kuo, + , T-C May 03* 658-669
static and dyn. behavior of memory cell array spot defects in embedded DRAMs. *Al-Ars, Z., + , T-C Mar 03* 293-309
switch MSHR, tech. to reduce rem. read memory access time in CC-NUMA multiprocessors. *Bhuyan, L.N., + , T-C May 03* 617-632

VLSI
CMOS VLSI implementation of low-power logarithmic converter. *Abed, K.H., + , T-C Nov 03* 1421-1433
highly regular and scalable AES hardware archit. *Mangard, S., + , T-C Apr 03* 483-491
linearly transformed binary decision diags., efficient minimization/manipulation. *Gunther, W., + , T-C Sep 03* 1196-1209
low-power antilogarithmic converter, VLSI implement. *Abed, K.H., + , T-C Sep 03* 1221-1228
modulo 2^n-1 adder design using select-prefix blocks. *Efstathiou, C., + , T-C Nov 03* 1399-1406
parallel CRC realization. *Campobello, G., + , T-C Oct 03* 1312-1319

Voltage control
voltage-clock-scaling adaptive scheduling techniques for low power in hard real-time systems. *Krishna, C.M., + , T-C Dec 03* 1594-1607

Volume control
test access mechanism optimization, test scheduling, and tester data volume reduction for system-on-chip. *Iyengar, V., + , T-C Dec 03* 1619-1632

Volume measurement
concurrent application of compaction and compression of test time and data volume reduction in scan designs. *Bayraktaroglu, I., + , T-C Nov 03* 1480-1489
test access mechanism optimization, test scheduling, and tester data volume reduction for system-on-chip. *Iyengar, V., + , T-C Dec 03* 1619-1632

W

Wearable computers
discharge current steering for battery lifetime optimization. *Benini, L., + , T-C Aug 03* 985-995
modeling, analysis, and self-management of electronic textiles. *Stanley-Marbell, P.S., + , T-C Aug 03* 996-1010
nonideal battery properties and their impact on software design for wearable computers. *Martin, T.L., + , T-C Aug 03* 979-984
using physical context for just-in-time information retrieval. *Rhodes, B., T-C Aug 03* 1011-1014
wearable computers (special section). *T-C Aug 03* 977-1014
wearable computers (special section intro.). *Smailagic, A., T-C Aug 03* 977-978

Web sites
sustaining availability of Web services under distributed denial of service attacks. *Jun Xu, + , T-C Feb 03* 195-208

Wireless LAN
caching scheme for routing in mobile ad hoc networks and its application to ZRP. *Beraldi, R., + , T-C Aug 03* 1051-1062
composable proxy services to support collaboration on mobile Internet. *McKinley, P.K., + , T-C Jun 03* 713-726
efficient multipolling mechanism for IEEE 802.11 WLAN. *Shou-Chih Lo, + , T-C Jun 03* 764-778
performance enhancements of ad hoc networks with localized route fix. *Duggirala, R., + , T-C Jul 03* 854-861
reliable real-time commun. in cooperative mobile appls. *Nett, E., + , T-C Feb 03* 166-180
wireless Internet (special section). *T-C Jun 03* 689-814
wireless Internet (special section intro.). *Yi-Bing Lin, + , T-C Jun 03* 689

Wiring
adaptive algorithms for maximal diagnosis of wiring interconnects. *Feng, W.-Y., + , T-C Oct 03* 1259-1270

Workstation clusters
boost perform. of nets., source routing, applying in-transit buffers. *Flich, J., + , T-C Sep 03* 1134-1153

Z

Zeri assignment
zero-aliasing space compaction of test responses using single periodic output. *Bhattacharya, B.B., + , T-C Dec 03* 1646-1651
